

FIBRAPAN/IBERPAN FORMA®

DESCRIPTION

It is a medium density MDF board with less density than our standard MDF FIBRAPAN or IBERPAN. It is manufactured from selected pine timber and bonded with synthetic resins at high temperatures. The final result is an ideal MDF board suitable for a great variety of uses. Classified E1.

CHARACTERÍSTICS

The most outstanding quality of FIBRAPAN LIGHT/ IBERPAN LIGHT is its low density and, thus, its lightness. Soft and smooth surface. Great uniformity and dimensional stability. Great lightness.

APPLICATIONS

Speaker boxes for sound equipment, doors, decorative frames and any elements for which weight is a crucial factor, are the most appropriate uses for FIBRAPAN LIGHT/ IBERPAN LIGHT. Of general use in dry environments.

ADVANTAGES

The low weight of FIBRAPAN LIGHT/ IBERPAN LIGHT makes it an ideal option for all situations in which the advantages of MDF as a material must be preserved, while considerably reducing weight.
